

CUSTOM TAILORED DESIGN

MAST
LANDSCAPES

PHASE 1: INITIAL CONSULTATION

This is the first face-to face meeting between a **MAST Landscapes** designer and you, the client. This initial meeting gives us both a chance to discuss your design needs and budget. At the end of this consultation we will provide you with an estimated range of costs for the design work.

Any information you provide such as architect's house plans and/or a survey of your lot is extremely helpful. This helps reduce your design costs by eliminating a lot of on-site measuring.

PHASE 2: PRELIMINARY DESIGN

Now begins the design process. The designer draws a preliminary design to meet your needs both functionally and aesthetically. Depending on the size of the project there may be a second meeting at this time to: 1) discuss preliminary design ideas, 2) ensure the design is moving in the right direction, 3) present estimated costs for the project and 4) decide if you wish to continue with the process.

PHASE 3: FINAL DESIGN/INSTALLATION

Once you've decided to use our services we will provide you with a more detailed design and contract. Pending your approval we will then schedule the installation. Larger designs may be divided into installation phases to accommodate your budget more comfortably.

CLIENT

ESTIMATED DESIGN FEE

NOTES

*Please feel free to call us with any questions you may have about any aspect of
MAST Landscapes' design/installation process: (540) 432-0788.*
